- Web Technologies: HTML, CSS
- Frameworks: ReactJS, Node.js
- Databases: MongoDB, MySQL
- Tools: Git

PROJECTS

Video Game Discovery Website - <https://game-hub-e324.vercel.app/>

April 2024

- Independently designed and developed the website.
- Utilized the RAWG API to fetch game data.
- Frontend crafted using Chakra UI and ReactJS with TypeScript.
- Served as the project lead and sole front-end developer.

DSA Problems Tracker Website - <https://dsaproblemtracker.netlify.app/>

October 2023

- Developed with my team during a hackathon.
- Front-end built using ReactJS.
- Problem data sourced from the LeetCode platform.
- Served as the project lead, learned ReactJS concepts during the development phase.

LEADERSHIP EXPERIENCE

- Led hackathon teams through ideation, development, and presentation phases, fostering collaboration and driving successful project outcomes.
- Served as a team lead for college projects, overseeing planning, execution, and delivery to ensure timely completion and high-quality results.

ACHIEVEMENTS

- Secured first place in the web design competition during my college's 2022 technical fest, demonstrating expertise in design principles using Wix.
- Won first place in the poster presentation titled "Way Waker" at my college's 2024 technical fest, showcasing creativity, research skills, and strong communication.
